

OCEANS FROM SPACE

Scuola Grande di San Marco, Venezia
24-28 October 2022

Venice, 21 October 2024

Dear Colleagues and Friends of “Oceans from Space”,

This newsletter is being forwarded to the OfS community, to provide an update about the latest post-conference matters, and as a complement to the OfS website, still available at www.oceansfromspacevenice2020.org. This newsletter aims to provide a focal point for all results and activities emerging in the wake of OfS V, and in preparation of OfS VI.

The current news:

[1] The compilation of the ***MDPI Remote Sensing OfS V Special Issue*** is nearing its end. Out of the 10 papers selected after the Symposium, 7 have been published already in final form, while the last 3 are still in the submission/review process. We aim to close the SI (www.mdpi.com/journal/remotesensing/special_issues/N5M29MQT28) within 2024.

[2] The ***Pillars of Hercules Foundation*** continues its plans for an International Workshop titled “*The Pillars of Hercules: A Mediterranean MOSE?*”, to be held in Venice in 2025, focusing on climate change, sea level rise and the fate of Venice-like coastal sites. The draft proposal is available at www.oceansfromspacevenice2020.org/xxx/yyy/zzz.pdf.

More details can be found on the OfS website. Inquiries or suggestions, in particular for point [2] above, should be addressed to the Secretariat. This newsletter will return every half-year, until the next Symposium is announced. Thanks for your continuing support. We hope to meet you all again in Venice, at the 2030 half-a-century anniversary of “Oceans from Space”.

Best regards,

V. Barale, (Ret.) Joint Research Centre, European Commission, Ispra (I)
J.F.R Gower, (Ret.) Institute for Ocean Sciences, Sidney (CAN)
L. Alberotanza, (Ret.) Consiglio Nazionale delle Ricerche, Venice (I)

G. Canali, NSA Group srl, Rome (I)
