

OCEANS FROM SPACE

Scuola Grande di San Marco, Venezia
24-28 October 2022

Venice, 28 April 2026

Dear Colleagues & Friends of "Oceans from Space",

Here is yet another issue of our newsletter, which covers the outcome of OfS V and the initial activities in preparation of OfS VI [see details on www.oceansfromspacevenice2020.org].

The selection of 10 representative papers, for the *MDPI Remote Sensing OfS V Special Issue*, has now been accomplished. All papers are available in full on the MDPI website [www.mdpi.com/journal/remotesensing/special_issues/N5M29MQT28]. Further, the publishing of a *Special Issue* reprint will soon complete this post-conference editorial project.

At this point in time, no new activities of the Pillars of Hercules Foundation can be reported. Plans to hold an International Workshop on sea level rise and the consequent fate of historical coastal sites, titled *The Pillars of Hercules: A Mediterranean MOSE*, are still ongoing, but no final date or venue have been decided upon so far.

Any news about all items above will appear on the OfS website. Inquiries or suggestions should be addressed to the Secretariat. This newsletter will continue to return every half-year, until the next Symposium is announced. Thanks for your continuing support. We hope to see you all in Venice, in 2030, to celebrate 50 years of "Oceans from Space".

Best regards,

V. Barale, (Ret.) Joint Research Centre, European Commission, Ispra (I)
J.F.R Gower, (Ret.) Institute for Ocean Sciences, Sidney (CAN)
L. Alberotanza, (Ret.) Consiglio Nazionale delle Ricerche, Venice (I)

G. Canali, NSA Group srl, Rome (I)
