

OCEANS FROM SPACE

Scuola Grande di San Marco, Venezia

24-28 October 2022

Venice, 28 October 2026

Dear Colleagues & Friends of "Oceans from Space",

This is the latest release of our newsletter, which covers the outcome of OfS V and the initial activities in preparation of OfS VI (see details on www.oceansfromspacevenice2020.org).

The *Remote Sensing OfS V Special Issue* post-conference editorial project is finally complete. See www.mdpi.com/journal/remotesensing/special_issues/NSM29MQT28 for the PDF version of all papers. A *Special Issue* reprint can also be downloaded (in PDF) or ordered (as a printed volume) from www.mdpi.com/books/reprint/12761-oceans-from-space-v.

The Pillars of Hercules Foundation has undertaken the preparation of a new signature paper, titled "Protecting the Mediterranean's Basin's Coastlines from Long-term Sea Level Rise: the Gibraltar Dam Option", for the MDPI Journal of Marine Science & Engineering. The Workshop "*The Pillars of Hercules: A Mediterranean MOSE?*" is still in preparation.

Please, monitor the OfS website for any news on the items above, and address all inquiries or suggestions to the Secretariat (coordinates below). This newsletter will continue to return every half-year, until the next Symposium is announced. We are grateful for your continuing support, and hope to celebrate 50 years of OfS with all of you in Venice, in 2030.

Best regards,

V. Barale, (Ret.) Joint Research Centre, European Commission, Ispra (I)

J.F.R Gower, (Ret.) Institute for Ocean Sciences, Sidney (CAN)

L. Alberotanza, (Ret.) Consiglio Nazionale delle Ricerche, Venice (I)

G. Canali, NSA Group srl, Rome (I)
